

Weatherford®

REAL RESULTS

Increased Production and Extended Well Life after Successful Integrated Efforts by Weatherford's WellServSM and Completion Groups

Location: Lynn, Texas (Hidalgo County)
Formation: Vicksburg
Depth: 11,800 ft +
Well type: Gas production
Hole size: 3-1/2 in.
Casing size: 12.95 lb/ft
No. of wells: 1

Objectives

- Set a wireline packer with 81 ft of 2-1/16 in.-OD screen attached across identified perforations with 3,100 PSI surface pressure.

Results

- Successfully set packer and screen, at 11,796 ft, on the first attempt

Value to Client

- Stabilized gas production by controlling sand entry
- Increased operator's return on investment with the resulting higher production rates
- Improved well life by stabilizing the wellbore
