

# Weatherford®

## REAL RESULTS

### Weatherford Meets Client's Urgent Need for Surface Logging and Data Integration on Major Bohai Bay Drilling Operation

#### Objective

- Provide the operator with improved surface logging and data integration services for offshore directional drilling operations in Bohai Bay, China.
- Prepare and mobilize personnel and equipment at short notice to coordinate with Rocoil's existing drilling and geological operations with minimal disruption.

#### Results

- All equipment was checked and tested by Weatherford personnel before mobilization.
- Weatherford personnel and equipment were mobilized and provided high-quality integrated mud logging services.

#### Value to Client

- Weatherford's prompt deployment of equipment and personnel provided the client with a seamless integration of mud logging services without nonproductive time.

*"Weatherford certainly rose to the challenge by mobilizing the equipment and personnel within a tight time frame, ensuring a seamless continuation in operations. Their focus and communication with our various departments was excellent."*

– Robert Hill, Drilling Manager, ROC Oil Company

Weatherford's prompt deployment of equipment and personnel provided the client with needed surface logging and data integration at short notice.
