

WELL BARRIERS

Does Your Barrier Match Your Operation's Needs?

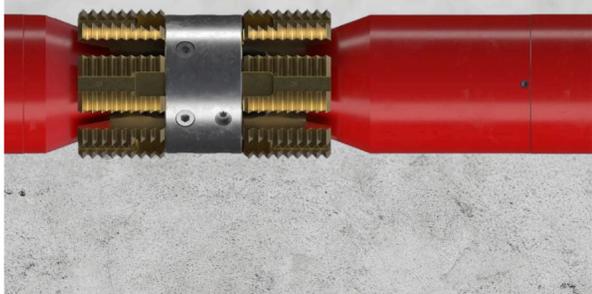

Select the right barrier with confidence

Mechanical well barriers protect your well across its entire lifecycle, from drilling and completions to intervention and abandonment. But no two wells are alike. Choosing the right one isn't about checking a box. It's about matching tool capability to operational reality.

That's why Weatherford offers a range of high-performance, V0-qualified barrier technologies, including retrievable bridge plugs and remote-opening valves, designed to meet the specific demands of each phase, each formation, and each challenge.

Why choose Weatherford well barriers?

Fit the barrier to the well

Build integrity into every phase

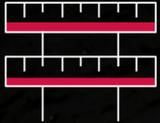

Decisions backed by experience

WELL BARRIERS

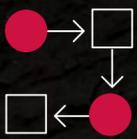

Every well deserves a barrier built for its specific challenges.

Choose the mechanical solution that delivers clarity and control across the entire lifecycle.

Fit the barrier to the well, not the other way around

Our mechanical barriers are engineered for versatility. Whether you need to drift through narrow tubing, withstand HPHT conditions, or avoid nipple profiles altogether, our tools are designed to adapt to your well architecture, not impose limitations.

Build adaptable integrity into every phase, not rigid approaches

From well construction through abandonment, barrier needs evolve. So should the solution. Our portfolio includes retrievable and remote-opening options for temporary and permanent applications, giving you dependable isolation for pressure testing, workovers, and long-term suspension.

Make decisions backed by experience, not assumptions

We bring more than just equipment. Our collaborative approach is shaped by thousands of successful runs and deep regional insight. Whether navigating North Sea P&A requirements or managing production in a high-rate well in the Middle East, our team works with you to align the right barrier to the well's purpose, environment, and lifecycle.

Our well barrier portfolio includes:

- ✓ ISO-Flex™ high expansion retrievable bridge plug
- ✓ ISO premium plus retrievable bridge plug
- ✓ ISO ultra extreme retrievable well barrier
- ✓ Remote-opening barrier valve
- ✓ ISO premium retrievable bridge plug
- ✓ ISO extreme retrievable well barrier
- ✓ ISO intelligent retrievable well barrier
- ✓ Inflatable retrievable bridge plug
