

WELLCAT[®]

WELL CONTROL ASSIST TEAM

WELLCAT[®]
A Weatherford Company

TAKE CHARGE OF PRESSURE CONTROL

Keeping the well under constant control is critical to oil and gas operations. Unexpected releases from the well can damage equipment, injure personnel, or worse. Our experienced WellCAT[®] team helps you to take charge of pressure control, from planning for difficult wells to responding to catastrophic blowouts.

An exclusive focus on well control enables us to assist our customers in overcoming their most critical well challenges—both onshore and offshore. Whether you need to identify and address potential issues before drilling starts or respond to well-control situations in progress, we can help. We combine a dedicated pressure-control facility, quality equipment, and skilled personnel to respond to any critical situation.

Our field experts have the collective knowledge to understand our customers' needs and deliver effective solutions. In fact, more than half of the WellCAT team has more than 25 years of experience with pressure-control snubbing and capping stacks in the shop and on hundreds of customer wellsites.

THE WELLCAT ADVANTAGE

ENHANCES

safety using extensive personnel training, thorough testing, and specialized equipment

SAVES

time with the early preparation of equipment and stacks as well as portable custom toolboxes

SUPPORTS

operations through worldwide teams, comprehensive inventory, and remote viewing capabilities

OUR WellCAT TEAM MEETS YOUR
MOST CRITICAL WELL SAFETY CHALLENGES

SAFETY

Our WellCAT track record attests to the safe operations and optimal performance we deliver for our customers. Since the inception of our WellCAT team in 1986, the equipment we have tested has performed in the field without fail.

RIGOROUS BOP TESTING subjects each piece of inventory to several stages of safety and quality verification

PERSONNEL SAFETY TRAINING includes an IADC-accredited, 8-day well-control course and additional 4-day water-survival course for offshore assignments

SPECIAL EQUIPMENT—including wellhead support systems, high-capacity cranes, and purpose-built scaffolding for the job site—enhance safety

SPEED

Comprised of highly trained field technicians, our WellCAT group can mobilize to any well control situation at a moment's notice—regardless of the location. We prepare our equipment in advance for minimum impact to your schedule.

TALL PREASSEMBLED STACKS are safely transported to the rigsite to save hours of costly torque time

PRE-SHIPING INSPECTION AND TESTING of each piece of equipment helps to eliminate costly nonproductive time for repair or replacement at the wellsite

CUSTOM TOOLBOX serves as a miniature machine shop stocked with parts and tools for quick access to maintenance and repair supplies while on location

SUPPORT

The WellCAT team supports your operations with a reputation built on reliability, responsiveness, and experience. The efforts of the team are fully backed by our global infrastructure to transport dependable personnel and equipment to anywhere at any time.

WORLDWIDE ASSISTANCE TEAMS lend support on the ground in North America and Europe and efforts are underway to rapidly add qualified teams in other regions

LARGE INVENTORY OF SPECIALIZED, CERTIFIED EQUIPMENT meets OEM specifications, API standards, and regional regulatory requirements

REMOTE BOP VIEWING enables monitoring tests in real time from the convenience of the office or from the field

OUR WELL-CONTROL SPECIALISTS ARE ALWAYS ON CALL.
