REAL RESULTS

Setting New Standards— QuickCut™ Casing Exit System Exceeds its Reputation Again

Objectives

- Create an exit through multiple strings of casing in a single trip.
- Complete the task quickly while maintaining gauge retention of the mills.

Results

- Completed window and rat hole in one trip.
- Completed total window milling operation in under 3 hr.
- Milled window and rat hole with minimal gauge loss.
- Reduced total rig possession time to less than 24 hr.

Value to Client

- Improved ROI by reducing rig possession time to less than 24 hr.
- Improved performance and speed of operation due to aggressive mill geometry.

Location
Saudi Arabia

Formation
Shale

Depth
3,953 ft (1,205 m)

Casing Sizes
