REAL RESULTS

Well Abandonment Services Integrated on North West Hutton Platform, Safely Abandon 40 Wells in North Sea With No Incidents

Objectives

- Provide a multidisciplinary, single-source solution for intervention and plug-and-abandonment operations in 40 wells located in the North Sea.
- Perform the operation efficiently and safely, without lost-time or environmental incidents.

Results

- Acting as lead contractor throughout the course of the operation, Weatherford Well Abandonment Services cut and recovered 36,450 ft (11 110 m) of tubulars and 23,200 ft (7071 m) of conductor in addition to 21 five-string, 5 three-string, 7 two-string, and 7 tie-backs.
- Successfully abandoned the reservoirs with combination of wireline, coiled tubing, cementing, and plugging technology.
- A total of 1 million hours were worked without incident during the course of the abandonment operations.

Value to Client

- Weatherford's ability to quickly and efficiently perform the operation resulted in substantial time and cost savings for the operator by avoiding lost-time and environmental incidents.

Weatherford's integrated service approach enabled the operator to successfully abandon 40 well slots on the North West Hutton Platform with no lost-time or environmental incidents.
