Uniset ABD Running Prong

The Uniset ABD Running Prong is used when running and setting Uniset ABC Tubing Hanger Plugs. Made up beneath the QXT Running Tool, the ABD Running Prong holds the equalising sleeve of the ABD (Anti-Blowout Device) open while running in hole.

On retrieving the QXT Running Tool and ABD Running Prong from the set ABC Tubing Hanger Plug the tell tale pin in the ABD Running Prong is sheared. This gives a positive tell tale indication that the ABD equalising feature is closed.
