

# *WFT-22 Casing Hanger*

Weatherford's WFT-22 slip-type casing hanger provides reliable casing suspension and positive annular sealing in all service environments. The WFT-22 casing hanger maximum-load capacity of 50 percent of pipe body yield is ideal for light- to medium-casing-load applications. The field-proven, straight-bowl design lands on a 45° load shoulder providing support, limited only by the capacity of the casing string. The casing hanger is used globally in the WFT-22 and WFT-29 wellhead-bowl profiles with or without lockscrews. This casing hanger is available in nominal sizes from 9 in. to 21-1/4 in. (228.6 mm to 539.75 mm).

WFT-22 casing hanger.

## *Applications*

- Land and offshore
- Light- to medium-casing-load situations with maximum working pressures of 10,000 psi (68.9 MPa)
- Normal- and critical-service conditions

## *Features, Advantages and Benefits*

- The WFT-22 casing hanger is readily available at all Weatherford wellhead locations worldwide.
- This casing hanger reduces total well cost versus mandrel casing hangers.
- The WFT-22 casing hanger is designed for easy installation and has a track record for reliability.
