In line with our Company-wide drive for innovation, we are always working to find new ways to share our Annual Report with you, our valued shareholders. This year, we decided to present our Annual Report as an interactive letter from our President and CEO, Mark A. McCollum.

CONTENTS

24 One Weatherford
26 Path to profitability
27 Looking to the future
28 The people that drive us
29 Video contest winner & entries
30 Photo contest winner & entries
In 2017, we set the stage for the future of our Company. When I accepted this job last March, I recognized the tremendous opportunity available to Weatherford, and also the time and effort it would take to realize its full potential. I’m pleased to say that the organization has embraced this drive for change and come together as One Weatherford to build a stronger Company.

Looking back on the year, one of the first steps we took to bolster the foundation of our Company was engaging in a thorough and comprehensive evaluation of the way we operate. We took a hard look at our entire organization and concluded that while Weatherford has many strengths, there was a lot of room for improvement in efficiency and consistency.

We addressed these areas for improvement head-on with an organizational realignment. Our new structure clarifies responsibility, prioritizes process discipline, and solidifies a strong connection between our operational leadership and field-level decision makers. By breaking down silos and creating alignment to a common set of goals and objectives, we built accountability into the fabric of our organization.
Our new organizational structure is a cornerstone in our plan to increase market share, drive out cost, deliver improved earnings, generate positive cash flow, and ensure Weatherford’s success in a changing market. We are building on the momentum created by our realignment by initiating a strategic transformation program designed to yield at least $1 billion in improved earnings within 18 to 24 months. The clarified organizational structure will ensure the transformation is anchored on process discipline, accountability, flawless execution, and innovation.

Since our last annual report, we have welcomed three new Board members: Roxanne Decyk, David King, and Angela Minas. The fresh perspectives of these skilled and experienced business leaders will be valuable assets to our organization going forward. At the same time, we bid a fond farewell to longstanding Directors David Butters and Robert Moses as they retire from our Board at this year’s Annual General Meeting. I want to personally thank both David and Robert for all they have contributed to Weatherford over many years of service.

**2017 STRATEGIC ACTIONS**

- **Welcomed a new CEO and COO**
- **Reduced nonproductive time 23% YOY**
  (Per 1k operating hours)
- **Completed organization realignment**
- **Enhanced board diversity**
- **Completed non-core asset sale**
OUR STRATEGIC ACTIONS

By any measure, 2017 was an important year in the history of our Company.

The strategic, decisive actions we took as a Company throughout the year laid the foundation for a sustainably profitable future.

Announced new President and CEO, Mark A. McCollum

Gained an accomplished and respected leader with:
- Extensive financial and executive leadership experience in the oilfield industry
- Deep knowledge of the oilfield services market and how to navigate its challenges
- Strong commitment to improving organizational health

Established our mission and core values

Re-energized and united our workforce by building a common One Weatherford culture focused on:
- Ethics and integrity
- Discipline and accountability
- Flawless execution
- Collaboration and partnership
- Innovation and technology leadership
- Commitment to sustainability

Welcomed new Executive Vice President and Chief Operating Officer, Karl Blanchard

Unified previously siloed segments of the business under a leader with:
- More than 35 years of experience in the oilfield services sector
- Extensive track record of delivering operational excellence, strong financial performance, and disciplined growth
- Deep understanding of how to capitalize on technology portfolios
Complete organizational realignment, paving the way for a transformation that is targeted to yield $1B in improved earnings within 18-24 months

Marked the start of our realignment, which will:
- Redefine the way we operate from a number of aspects, including operations, supply chain, manufacturing, sales, and functional support
- Improve profits by further lowering our support-cost ratio, rationalizing our manufacturing footprint, enabling more disciplined supplier management, realizing field efficiencies, and gaining additional market share
- Encourage integration and create synergies

Define our path to sustainable growth

Created a comprehensive corporate transformation plan that includes:
- Sale of U.S. hydraulic fracturing business – $430M (complete)
- Sale of land rig drilling business
- Further non-core divestitures
- Additional cost savings
- Improved profitability

OUR RESULTS

Our 2017 accomplishments lay the critical foundation for change in 2018 and beyond as we continue on our path to deliver improved financial performance and long-term shareholder value.
- Refreshed our leadership team
- Lowered our support ratio
- Reduced nonproductive time
- Positioned ourselves to achieve significant cost savings
- Redefined our culture and focused on organizational health
- Diversified our board
- Monetized non-core assets
As we have charted the course for the future of our Company, we have strengthened our focus on our customers, who are essential partners in our success. All of the changes we have put into place to make Weatherford a more profitable company also benefit our customers by making Weatherford a stronger partner and a more competitive force in the oilfield services marketplace. Our new structure, processes, and procedures enable us to enhance the quality and consistency of our products and services, develop value-added technologies, and work more closely with customers to find solutions that address today’s most pressing challenges.

Since I joined the Company, our customers have consistently told me that they truly appreciate our collaborative approach as well as the technologies and services we offer. The customer safety and service quality awards we received in 2017 are testaments to their support as well as to our strong commitment to flawless execution. Our overall service quality performance improved in 2017, as demonstrated by our 23% year-over-year reduction in nonproductive time.
We also developed and commercialized several new technologies in 2017, including the ForeSite™ production optimization platform, which leverages data from the entire production ecosystem to maximize production and reduce costs; the AutoTong™ system, which delivers consistent connection makeup and assures greater well integrity; the Raptor™ 2.0 cased-hole evaluation system, which reveals bypassed oil and gas reserves with accurate through-casing reservoir characterization; the HeatWave™ Extreme LWD service, which delivers high-resolution triple-combo logging-while-drilling data in ultrahigh-temperature wells; and the Endura® dual-string section mill, which creates a stable and verifiable rock-to-rock barrier during plug and abandonment operations.

SAFETY AND SERVICE QUALITY

We strive each day to ensure that our employees are safe and that we deliver our products and services to our customers the right way, the first time.

Our core values are key to making this goal a reality. Everyone within our organization is expected to embrace these values and remain dedicated to delivering an injury-free workplace as well as peak customer satisfaction.

We emphasize to employees that they must be committed not only to their personal safety, but also to that of our coworkers so that we may all return to our family and loved ones every night without any injuries.

With a distinct focus on safety and service quality, we continued to deliver exceptional services to our customers in 2017. We experienced a record year for our nonproductive time (NPT) performance, with a 23% decrease in NPT year-over-year (per 1,000 operating hours).

23% REDUCTION IN NPT (YOY) PER 1K Operating hours

We also achieved significant milestones and are especially proud of the awards received from customers as they are a testament to our focus on flawless execution and to the value of strong customer relationships.
Spring brought recognition from two major operators. On April 28, World Safety Day, Weatherford received a Safety Champion award from Total Italia in recognition of excellent safety performance on the Tempa Rossa project. In June, we received the Eni Safety Award for second consecutive year.

In December, Weatherford was named Wells Supplier of the Year 2017 by Shell International Exploration & Production Inc. in recognition of our outstanding safety and service quality as well as the Company’s collaborative, solutions-based approach. Mark A. McCollum accepted the award from Shell Executive Vice President, Wells, Paul Goodfellow, at Shell’s Houston headquarters.
OTHER NOTABLE ACHIEVEMENTS

ZERO LOST TIME INCIDENTS ACHIEVED

- 20 years without LTI at our East Leake facility in the UK.
- 16 years without LTI at our Songkhla facility, Thailand.
- 10 years without LTI in Thailand with recognition from PTT Exploration and Production.
- 8 years without LTI for our operations in Denmark.
- 8 years without LTI at our Baku, Azerbaijan operations.

API Q2 CERTIFICATION ACHIEVED

- Aberdeen, Scotland, received API Q2* certification, becoming the first facility in the United Kingdom to achieve this certification.
- Macaé, Brazil, facility also achieved API Q2 certification.
- Malaga, Australia, facility successfully achieved API Q2 certification, making us the first company in the country to receive this recognition.

* The American Petroleum Institute (API) Specification Q2 is the world’s most advanced industry certification standard for oil and gas service providers. This achievement recognizes the robustness of our Operational Excellence and Performance System, which assures personnel competency, risk assessment, contingency planning, and many other key elements of safety and service quality.

As we continue to optimize the performance of our organization, we have flattened our structure into core geozones, which brings decision making closer to the front lines. With this structure, we have placed service quality, health, safety, security, and environment (QHSSE) leads within each of our geozones. These leaders are continuing to embed the importance of safety and service quality in all that we do and now have greater control to execute decisions in a timely manner. This is another example of how we are evolving with the wellbeing of our customers and employees top of mind.
Our strong commitment to innovation is reflected in the technologies we brought to market throughout the year. By developing technologies that address specific operator challenges, we enable our customers to achieve their objectives more efficiently and profitably.

This drive for innovation continues in 2018 as we enhance our drilling, formation evaluation, well construction, completion, and production portfolios.

**FORESITE™ PRODUCTION OPTIMIZATION PLATFORM**

In May, we launched the ForeSite™ production optimization platform, a single-platform solution that uniquely integrates physics-based models and advanced data analytics to increase equipment uptime and ultimately extend asset life. The state-of-the-art technology was featured in a keynote presentation given by Intel at the 2017 Internet of Things Solutions World Congress. Since then, we have installed the ForeSite platform on 1,800 reciprocating-rod lift units in the U.S.

**AUTOTONG® SYSTEM**
The AutoTong system, which was introduced by the Company in September, has been successfully deployed on four jobs globally, including land and offshore operations. In each case, the technology delivered consistent connection makeup and immediately alerted the rig crew to any connections that did not meet the established parameters, thereby assuring greater well integrity. Customers have been impressed with the consistency of the connection-makeup graphs as well as with the overall efficiency of the system.

**RAPTOR™ 2.0 CASED-HOLE EVALUATION SYSTEM**

Expanding on the capabilities of our Raptor cased-hole reservoir evaluation tool, the Raptor™ 2.0 system combines a pulsed-neutron wireline logging device with advanced petrophysical workflows. The system has been tested and proven in more than 200 field runs, including several noteworthy jobs in North America and Latin America. In Western Canada, the system assessed the remaining production potential of three shut-in unconventional wells and identified untapped oil- and gas-producing zones in two of the three wells.

**HEATWAVE™ EXTREME LWD SERVICE**
After a two-year period of joint development and successes with Chevron, the HeatWave Extreme logging-while-drilling (LWD) service became commercially available to all operators in May 2017. The service has been deployed in 76 wells to drill more than 300,000 total feet. To date, it is the only triple-combo LWD technology to have run successfully at temperatures exceeding 175°C.

**ENDURA® DUAL-STRING SECTION MILL**

The Endura® dual-string section mill sets the stage for a permanent, verifiable rock-to-rock barrier while fulfilling the strictest regulatory requirements for plug and abandonment (P&A) operations. Additionally, it can reduce the time needed for a P&A operation by half, saving millions of dollars in the process. The technology was deployed offshore Australia in 2017. The operation was completed in 147 hours, which saved the operator 118 hours of rig time—valued at $1.97 million—compared to conventional P&A methods.
THE NEXT WAVE OF INNOVATION

DRILLING OPTIMIZATION

- Rotary-steerable systems that combine reliable, high-performance drilling with precise directional control
- Managed pressure drilling systems that seamlessly integrate into a broad range of rig infrastructures, including offshore units
- Downhole deployment valves that can be run without control lines, reducing the time and cost of installation
- Ultrasonic imagers that capture high-resolution borehole images and caliper measurements while drilling

AUTOMATED TUBULAR RUNNING

- Mechanized AutoTong® systems that increase running speeds, reduce safety risks, and eliminate makeup errors on large offshore rigs and deepwater drillships
- Trackless tong-positioning devices that enable automated change-outs from one joint of pipe to the next

ADVANCED COMPLETIONS

- Systems that execute upper and lower completions in a single trip, leveraging RFID technology
- Premium small composite plugs that enable faster, more efficient plug-and-perf stimulation
- High-reliability, small optical gauges for reservoir monitoring
- Tubing-retrievable safety valves rated for deepwater applications

SMART LIFT

- Expanded capabilities for the ForeSite™ production optimization platform, including optimization support for gas-lift systems and electric submersible pumps
- New Rotaflex® long-stroke pumping unit model that enables easier servicing and earlier transition to rod lift
- A coated version of our COROD® continuous rod that extends rod-string and tubing life in deep wells with corrosive environments
OPTIMIZED SOLUTIONS

In 2017, as a reflection of the changes throughout the industry, we worked to redefine Weatherford as more than a service provider by establishing problem-solving partnerships with our customers.

Rather than presenting operators with a menu of tools and services for their consideration, our sales team now meets with customers about overall challenges and designs optimized solutions based on their needs. These solutions leverage the fundamental strengths of our portfolio and draw on synergies among products and services in different areas of the business.

RFID-ENABLED TECHNOLOGIES

Weatherford pioneered the use of RFID technology in downhole tools, and we continue to apply the technology in new ways to enable greater flexibility in drilling, cementing, and completion operations.

DIGITAL OILFIELD TECHNOLOGIES
Our latest technologies exemplify how we are embracing the industry’s digital transformation. We recognize that this is a new era for the oil and gas industry, and we need to look beyond what has worked in the past. This means embracing automation and digitalization, including principles such as the Internet of Things, Big Data, and Machine Learning.

LIFT FOR UNCONVENTIONALS

Drawing on our expertise as a leader and innovator in unconventional production, we are the only service company to offer integrated life-of-asset artificial lift systems. Our customized, optimized solutions can be applied to maximize production in any unconventional field, from the Permian Basin to the Kingdom.

WELL INTEGRITY

The phrase “total cost of ownership” was omnipresent throughout the industry in 2017. One of the best ways to reduce total cost of ownership is by taking proactive steps to assure well integrity. Weatherford’s portfolio of well construction, completion, and intervention services enables us to design comprehensive well integrity programs that reduce costs in the short and long term.
OFFSHORE COMPLETIONS

When Weatherford entered the offshore completions market, we decided to take a different approach than other companies. Rather than adapting old technologies for new applications, we’ve created an extensive portfolio of modern completion technologies for today’s complex deepwater wells.

PRODUCTION RESTORATION

While the process of getting a well to initial production follows a fairly standard sequence—drilling, evaluation, completion—restoring lost production can involve a wide variety of products and services deployed in innovative ways. Our rigless production restoration solutions use an integrated approach to find and fix common production problems, as well as to identify and produce additional reserves.
At the 2017 Offshore Technology Conference, we received a Spotlight on New Technology Award for our AutoFrac® RFID-enabled stimulation system, which enables efficient stimulation in openhole sections of extended-reach offshore wells where traditional technologies have often failed to provide adequate reliability.

BEST PRODUCTION TECHNOLOGY
- 2017 WORLD OIL

We also earned top honors in two categories at the 2017 World Oil Awards. The Raptor™ 2.0 cased-hole evaluation system, which detects bypassed reserves behind the casing, was named Best Production Technology.

BEST WELL INTEGRITY TECHNOLOGY
- 2017 WORLD OIL

In the category of Best Well Integrity Technology, the Endura® dual-string section mill was recognized for its ability to create a stable and verifiable rock-to-rock barrier during plug and abandonment operations.
I firmly believe that a strong culture is a key ingredient to unlocking our full potential. With the introduction of a new mission statement and articulated values, we reinvigorated a “One Weatherford” spirit, unifying the organization as we embarked on the initiatives that are fundamentally changing the way we operate. In one short year, we have seen a dramatic difference in the culture of our organization. Our Weatherford team has embraced the changes we’ve rolled out over the past several months, and their focused commitment will make a tremendous difference as we move toward our 2018 and 2019 objectives.
OUR CORE VALUES

In 2017, we introduced the Company’s mission and core values after welcoming Mark A. McCollum as our new President and CEO. This was one of the first actions that Mr. McCollum took as our Company’s leader. He recognized the importance of building a strong culture in propelling the organization to new heights.

At Weatherford, our mission is to deliver innovative technologies and services designed to meet the world’s current and future energy needs in a safe, ethical, and sustainable manner. Grounded by our core values and inspired by our world-class people, we are committed to being a trusted business partner to those we serve. This is our purpose. It’s why we get up and go to work each day.

Like our mission, our core values are more than just nice words on a page or a box to check — they are the driving force that guides the actions of our global workforce every day.

OUR VALUES

ETHICS AND INTEGRITY

An unwavering commitment to act respectfully and responsibly in every aspect of our work.

DISCIPLINE AND ACCOUNTABILITY

A commitment to work toward set goals, and dedication to delivering on those goals.

FLAWLESS EXECUTION

A relentless pursuit to deliver maximum value to our customers and achieve the highest levels of safety and service quality.

COLLABORATION AND PARTNERSHIP

A dedication to building strong and transparent relationships with our customers, partners, and each other that further our shared mission.

INNOVATION AND TECHNOLOGY LEADERSHIP

Inspiration and drive to create technologies that deliver exceptional value.

COMMITMENT TO SUSTAINABILITY

A focus on the diversity of our enterprise and awareness of the impact our actions today have on the future for our stakeholders, community, and environment.
Fundamental to our sustainability goals is our focus on being a good corporate citizen, and maintaining excellence in the quality of our work, in the safety of our employees, and in our efforts to protect the environment as we help provide energy vital to economic development and quality of life.

In 2017, our Sustainability Committee – which is comprised of leaders from a cross-section of our organization – tightened our focus on key environmental, social, and governance (ESG) risks and opportunities and ensured their incorporation into the Company’s enterprise risk management (ERM) plan. We understand that sustainability is an ever-evolving journey and seek to make material progress by zeroing in on these core issues.

We will continue to strengthen our sustainability program and are committed to joining the UN Global Compact and Human Rights Campaign in 2018.

## Responsible Operations

### Security

**Enhance Weatherford’s preparedness to identify and manage the consequences of risk events that may befall the company**

- **2016 performance**: We aim to prevent any activity that may disrupt company operations to an unacceptable level.
- **2017 performance**: Identified security specific risk exposures that presented unacceptable consequences to Weatherford and developed Security Emergency Response Plans and Security Emergency Evacuation Plans for all “High” and “Medium” risk countries in which Weatherford operates.
- **2018 goals**: Transitioned all Weatherford security risk management materials to a proprietary online platform allowing real-time vision of risk. Developed the Disruptive Events Management Standard to underpin an all-hazards approach to enterprise resilience management going forward.
- **2018 goals**: Issue Disruptive Event Management Standard, triggering formation of Disruptive Event Management Teams in each of Weatherford’s 14 geozones, responsible for identifying risks through workshops, preparing responses to scenarios or incidents that could befall the company.

### Workforce Retention

**Foster a culture of inclusion that celebrates our diverse workforce and enables employees to bring their true self to work**

- **2016 performance**: No formal program in place.
- **2017 performance**: Established Diversity and Inclusive (D&I) Leadership Committee which issued the Company’s first enterprise engagement survey on D&I, approved a global minimum maternity and adoption leave policy, enacted a global real estate policy for nursing rooms, and established three employee network groups: Women of Weatherford, Weatherford Young Professionals, and Weatherford LGBTQ.
- **2018 goals**: Drive support for our Networks and establish new ones desired by our employee base. Implement advancements to our recruitment process inclusive of blind resume review to tackle biases in hiring. Issue D&I training on bias – conscious and unconscious – so that we raise our enterprise culture bar to ensure respect and inclusivity always and for everyone.

### Global Citizenship

**Promote a culture of giving that is aligned with Company values, makes a direct impact to the communities in which we operate, and is measureable**

- **2016 performance**: No formal policy in place.
- **2018 goals**: Issue Charitable Giving Standard to all employees, triggering employees to record charitable giving and sponsorship requests in a central portal. Ultimately, this will provide the Company greater visibility into our spend and ensure alignment with Company goals.
COMMUNITY ACTIVITY

One of our core values at Weatherford is making a positive impact on the people and places we touch as a company. We are committed to being a trusted partner to all the organizations we interact with, including those that care for our larger community.

In 2017, Weatherford and partners presented a check for $345,000 to three Houston-area non-profit organizations at the annual Weatherford Walks charity event. The donation was split equally among the Houston Area Women’s Center, Camp Hope, and Small Steps Nurturing Center. Since its inception, Weatherford Walks has raised more than $1.2 million for the Houston community.

More than 1,300 participants registered to walk the mile-long race track in support of these local organizations. Our employees and trusted business partners made generous monetary donations to support the cause. The walk was followed by a donation ceremony and family day with music, games, and lunch at the Sam Houston Race Park Pavilion.

All three organizations celebrated are beneficiaries of past Weatherford Walks events. The Houston Area Women’s Center, which helps individuals affected by domestic and sexual violence in their efforts to move their lives forward, was the beneficiary of the inaugural Weatherford Walks in 2014. The 2015 event benefitted Camp Hope, a Houston organization that provides peer support, mentoring services and housing for veterans and their families suffering from combat-related post-traumatic stress disorder. In 2016, Weatherford Walks supported Small Steps, a Houston-based organization dedicated to the social, emotional, physical, intellectual, and spiritual growth of economically at-risk children and their families.

Weatherford Walks proudly supports charitable entities that are rooted in the local community and provide services integral to helping our neighboring families in need.
Last year, we began to emphasize the importance of organizational health starting with re-energizing our “One Weatherford” spirit. A campaign that was originally born a decade ago was refreshed to unite employees around a common culture – encouraging them to put our core values into action and work as a team.

One Weatherford was reintroduced at a pivotal moment when we need to come together to propel our organization forward. We launched our first global town hall called One Weatherford Day as a means of re-energizing our employees. Our employees came together for the first time to learn the beginnings of our transformation strategy.

Now, in the halls and at the field, you will hear employees affirm that “individually, we are impressive but together we are unstoppable – we are One Weatherford.”

We are encouraged to see these concepts become embedded as a touchstone of our business. It is with this spirit and vigor that our employees are driving our transformation forward and making a measureable difference.
ONE WEATHERFORD DAY: SHOWING OUR SPIRIT AROUND THE GLOBE
Our key priorities for 2018 and 2019 are to reduce debt, strengthen our balance sheet, and restore our financial flexibility. We took the first important steps toward those goals in 2017, as we recognized that we must create our own success regardless of market conditions.

Our path forward involves long-term, sustainable changes to all areas of our business. Since announcing our $1 billion target, we have identified a number of distinct operational and functional initiatives. These include field improvements, enhancements to our supply chain and procurement policies, a shift in our approach to sales, general and administrative efficiencies, and manufacturing process improvements. We have also completed a top-down and bottom-up validation process that confirms the size of the opportunity is at least as large as what we had estimated. And we are currently executing detailed, comprehensive, and clearly defined action plans designed to get us to our $1 billion goal. Bottom line: We have a clear line of sight on our $1 billion goal as well as a disciplined process in place designed to ensure that we can deliver.

We also progressed in our plans for strategic divestitures. We divested our U.S. pressure pumping and pump-down perforating assets at the end of the year, which enabled us to pay down debt and focus our capital resources on other businesses with higher returns. We will continue to seek out and capitalize on opportunities to divest other areas of our business that are not critical to our strategy going forward, enabling us to further reduce our debt burden. We remain committed to cutting debt-to-EBITDA ratios in half by year-end 2019, and are determined to ultimately return to an investment-grade rating.
There is much to look forward to in 2018 and beyond. We have a competitive technology portfolio with a strong set of product and service offerings that gives us broad exposure to the fastest growing markets, particularly U.S. unconventionals. In addition, we are exceptionally well positioned to benefit from growth in international land markets, particularly Russia and the Middle East. While we expect continued stress in select areas, such as Venezuela, when you look at the market for 2018 overall, conditions favor Weatherford.

Our realigned operational matrix, which is also reflected in our financial reporting structure, enables us to optimize how we deploy products and services in the field by tapping into new synergies and efficiencies. Additionally, our shift to a more problem-solving, partnership-based sales approach facilitates more cross-product line selling, more joint technology developments, and greater market share. The combination of reduced operational costs and increased revenue opportunities will enable us to achieve sustainable free cash flow.

Our potential far outpaces our recent results, and we are determined to close that gap. We are fully committed to the strategy we have laid out ahead of us, and we are confident that it will produce results for our stakeholders.
We have come a long way from where we were a year ago, and that is because of our people. I want to thank our entire Weatherford team for helping us to build a stronger, more innovative, and collaborative Company. Your hard work has not gone unnoticed. We have started down a solid path, with many of your ideas leading the charge. We simply could not achieve the great things ahead of us without your support.

I came to Weatherford because of the overwhelming number of opportunities I saw from the outside, and as I have worked with people across the organization over the past year, I have become even more certain of our ability to achieve the Company’s full potential.

By executing on the strategy that we developed over the course of 2017, Weatherford will emerge a much stronger company with a clear purpose and vision for the future. It is my mission to ensure this happens for the greater good of all our stakeholders.
