CANVAS ROADMAP

- As you work with Canvas, you'll find things you like, don't like, need, or want.

- We want that feedback to drive Canvas' roadmap.

- Features under consideration:
  - Layers
  - Importing of standalone C# and VB.NET code
  - 64-bit support
  - Date/time choosing controls
  - UIS command button
  - Bullet graph control

RECOMMENDED NEXT STEPS

1. Install Canvas 9.1 (or 9.2 soon)
2. Identify some isolated screens or workflows to migrate
3. Work through migration process, either using utility or by hand
4. Identify issues, shortcomings, or aspirations
5. Communicate and iterate with us
6. Repeat
