## **Weatherford Canada Drilling Services Facility Gains API Q2 Certification**

### **Nisku Facility Recognized for Quality Management**

**HOUSTON, May 31, 2016** – Weatherford International plc announced today that the Weatherford drilling services facility in Nisku, Alberta, Canada, received API Specification Q2 certification. To gain certification, a facility must demonstrate a robust quality management system that assures personnel competency, risk assessment, contingency planning and other key elements.

The Nisku facility is the second Weatherford facility in Canada to achieve this certification, following a Weatherford-Canada Partnership facility in Paradise, Newfoundland, certified last year.

“This certification validates the success of our service-quality and risk-mitigation programs, which are driven internally by our Operational Excellence and Performance System (OEPS),” said John Raine, vice president of quality, health, safety, security and environment (QHSSE) at Weatherford.

“API Q2 certification is a high bar of achievement,” said David Reed, region vice president, Canada, at Weatherford. “We were able to meet this challenge because of our strong culture of safety, quality and teamwork, as well as the implementation of OEPS.”

#### **About Weatherford**
